

AMENDMENTS TO THE CLAIMS

1. (Currently amended) Mobile phone equipment, comprising:
 - a photographing unit ~~(12)~~ for converting incident light into an electric signal and outputting as image data;
 - a first image data storage unit ~~(14)~~ for temporarily storing a plurality of original image data obtained with a continuous photographing function of said photographing unit;
 - a display unit ~~(17)~~ for displaying said original image data; and
 - an image data playback unit ~~(11)~~ for continuously displaying on said display unit ~~(17)~~ the plurality of said original image data stored in said first image data storage unit ~~(14)~~.

2. (Currently amended) The mobile phone equipment according to claim 1, further comprising
 - a thumbnail image data generation unit ~~(11)~~ for generating thumbnail image data from said original image data, wherein
 - on said display unit ~~(17)~~, an overview of said thumbnail image data of the plurality of original image data is displayed after the plurality of said original image data are obtained with the continuous photographing function of said photographing unit ~~(12)~~.

3. (Currently amended) The mobile phone equipment according to claim 2, further comprising
 - a second image data storage unit ~~(15)~~ for permanently storing image data, wherein
 - in the second image data storage unit ~~(15)~~, the plurality of said original image data obtained in single photographing through the continuous photographing function of said photographing unit ~~(12)~~ and said thumbnail image data are stored in an identical folder.

4. (Currently amended) The mobile phone equipment according to claim 2, wherein
 - in said first image data storage unit ~~(14)~~, said original image data and said thumbnail image data are temporarily stored.

5. (Currently amended) The mobile phone equipment according to claim 4, further comprising

a second image data storage unit (15) for permanently storing image data, wherein in the second image data storage unit (15), the plurality of said original image data obtained in single photographing through the continuous photographing function of said photographing unit (12) and said thumbnail image data are stored in an identical folder.

6. (Currently amended) Mobile phone equipment, comprising:

a photographing unit (12) for converting incident light into an electric signal and outputting as image data;

a thumbnail image data generation unit (11) for obtaining said image data as original image data and generating thumbnail image data from the original image data;

a display unit (17) for displaying an overview of a plurality of thumbnail image data generated from a plurality of original image data obtained by said photographing unit through a continuous photographing function;

an image data storage unit (15) for storing said original image data and said thumbnail image data in an identical folder; and

an image data playback unit (14) for reading said original image data from said folder and continuously displaying on said display unit.

7. (Currently amended) The mobile phone equipment according to claim 6, wherein in said image data playback unit (14), the plurality of said original image data are displayed on said display unit with a constant time interval.
